

Celebrating One Year at Spece Natalia Gomez

We're thrilled to celebrate our amazing team at Spece, and this month, it's all about Natalia! Earlier this month, Natalia marked her one-year anniversary with us.

It feels like she's been part of our team forever—in the best way possible. Her bright smile and bubbly energy light up the office, making her an incredible fit for our crew. If you're ever in Santurce, you can't miss her, though you might also catch her at our San Patricio location a few days a week.

We're so grateful for our Sales and Support Specialist, who continues to be an integral part of Spece. Happy first work anniversary, Natalia—here's to many more!

FUN FACTS

At Spece, we ensure redundancy in both power and internet. 

Our primary connection is a fiberoptic line from Urban Networks, with backup from Aeronet's point-to-point wireless service.

Creating an "internet safety net" that's nearly failproof!

EVENT SPACE

The holidays are quickly approaching!

Are you or someone you know looking for an event venue?

Spece is ready to host.

MEMBER SPOTLIGHT: GREEN POWER TECHNOLOGIES

Sam Talman and Josh Collins of Green Power Technologies Puerto Rico specialize in developing and operating small hydroelectric turbines across Puerto Rico and the United States. Their mission is to expand renewable energy solutions, particularly in rural regions where energy and water infrastructure are often unreliable and expensive. Their small hydro plants deliver resilient, cost-effective, and essential distributed electrical power by leveraging limited and variable water flows. Sam and Josh partner with businesses, farms, water utilities, and other energy consumers in areas where water resources are available, and the need for improved energy solutions is critical.
